2005

SKILLS

HTML
CSS
JAVASCRIPT/ES6
ANGULAR JS
REACT
C#
.NET
SSMS
SQL
UNIT TEST/TDD

RELEVANT EXPERIENCE

Proforma, Tampa, FL

Junior Developer

2019 - Present

Proforma is a multi-franchise, multi-million dollar print and promotional marketing company. As a Full Stack developer, I use primarily AngularJS & C#/.Net.

My work projects have included:

- building a shipping notification platform that allows our franchise owners to send their shipping notices, as well as marketing advertisements, rating purchases, and reorders via direct emails to customers
- writing the MD5 encryption we use to secure our landing pages
- working as a lead managing configuration and team migration in updating our app from EF Core to .Net 3.0
- working on updating our Unit Tests to improve coverage of existing code while moving toward a TDD mindset in our greenfield development.
- maintaining and updating legacy modules while developing new products

Suncoast Developers Guild St. Petersburg, FL

2019

SDG is an immersive and intensive coding program focusing on full-stack web developers. The curriculum includes both front-end and back-end fundamentals, resulting in graduates who develop interactive client-side applications backed by databases and server-side technologies. For the variety of projects we built we used a tech stack that included HTML & CSS, JS & React (including Hooks), and C# & SQL.

My projects included:

- Minesweeper: a React app, consuming an external API, with a dog park theme
- At the Movies: my first group project as well as my first use of React Router Dom
- Oh the Places You'll Go: my React Hooks/C# capstone project built to help me track my road trips

PROJECTS FOR ME

- My Library: a React Hooks/C# CRUD app that allows me to keep track of my books, built to my specifications, including tracking library books, books I won't finish, and books I've owned and given away.
- Fibonacci Counter: a small React based site. I wanted to practice some math and timer logic, as well as Netlify deployment.

PREVIOUS EXPERIENCE

Books at Park Place, St. Petersburg, FL

Manager

2010 - 2019

As a manager at the bookstore my tasks focused on customer service and experience, and also included wholesale quotes, orders, and deliveries, inventory control, special orders, training new employees, public relations and outreach, and technical support of internal POS system.

WHEN I'M AFK

I like reading, road trips, taking bad pictures, dog beaches, kayaking, home repair, finishing home repair, and I am excited about every piece of news about space.
